

hi!

If "meta-learning" is learning how to learn, then meta-skills in this context involve "learning how to work." Meta-skills are the skills you need to leverage other skills.

IN THE FUTURE, WORK WILL BE INDISTINGUISHABLE FROM ART

The cyborg does not dream of community on the model of the organic family, this time without the oedipal project. The cyborg would not recognize the Garden of Eden; it is not made of mud and cannot dream of returning to dust.

LEAD PROJECT ENGINEER AT LUCID

LUCiD is a living project meaning, we are constantly travelling around the world to document the health of our planet. In addition we are connecting with those who are developing programs and technology to alleviate the damage we are doing to our planet.

JULY 13-31, 2015

ECONOMIC LEAD AT COPERNICUS I

The goal of the program was to design, build, and test virtual models and software libraries that model the technical development and surrounding economic environment of an Endogenously-Powered Space Elevator. This process would create an electrical loop, allowing satellites, scientific equipment, and other materials to be taken to space at near zero marginal cost. Split into two teams, the Technical Team and the Economics Team, the participants were to build mathematical models for an architecture capable of delivering these payloads into orbit.
